1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 7, 9, 10, and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamada et al in view of Asakura et al. Yamada et al disclose an inner lid attaching structure for a personal watercraft with a deck, a hatch 26 with an inner lid (bottom portion of lid 26) which is airtight (note column 4, paragraph 0058). Not disclosed by Yamada et al is the particular lock and projection. Asakura et al teach a lock and projection for a lid. It would have been obvious to a person of ordinary skill in the art at the time the invention was made to form the lid of Yamada et al with a lock and projection as taught by Asakura et al for improved locking of the lid.

3. Claims 1-6 are allowed.

4. Claims 8, 11, 12, and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tsumijama et al show a lid 1A.
